Subject: RE: Seldovia Revised Phase II QAPP

Hello Michael & Tracie,

Attached is the latest QAPP revision you sent –yesterday. Imbedded within this QAPP are my comments and recommendations – please address them. Also, wait for Lon’s review comments.

As far as I am concerned, all of the information that will be needed for sample collection is in the QAPP, so if you are about to miss the first salmon run because of the QAPP approval, I am giving you a conditional approval go ahead and collect the samples as planned. Keep the samples frozen at EH until we completely approve the QAPP.

Also, please submit the homogenization SOP that will be followed as I am confused with what was written in the QAPP. The target RLs and the RLs, MDLs of the labs for the target compounds are also important and should be included in the QAPP.

Thank you and looking forward to your re-submission a complete QAPP with Appendices.

Subject: Seldovia Revised Phase II QAPP

Hi Gina,

Here is our revised QAPP. I think we have answered everyones comments and concerns here to the very best of our knowledge. Please let us know if there are any new concerns or suggestions that may have come up since this was initially sent to us.

Thank you,

Michael
